Matric
Cathedral School

Mar 2013 - Mar 2015

Experience

Senior Flutter Developer
Macquires

Sep 2023 - Present

- I work remotely for a Saudi-based company on a government project for the Ministry of Economy and Planning. The project focuses on an HR application designed for the ministry's employees, streamlining various administrative processes.
- Participated in agile development processes, contributing to sprint planning, daily stand-ups, and retrospectives.
- Coordinated with UX and UI designers to translate visual designs into functional mobile applications.
- Managed version control using Git, facilitating team collaboration and maintaining code integrity throughout project lifecycles.

Flutter developer
NexgenVentures

Dec 2021 - Aug 2023

Here i worked on a multiple projects projects that include salah mate, mealsmash , css exam campanion etc .

Trainee Flutter Developer
AugerSoft

Aug 2021 - Nov 2022

I worked remotly for this company , here i learned all the basic of dart and flutter and how to implement different UI of apps in flutter.

Projects

Madaar App:

Madaar is a comprehensive HR management application developed for the Ministry of Economy and Planning. The app streamlines various HR processes for the ministry's employees, including attendance tracking, leave management, secondments, and personal data management.

The application provides a seamless experience for both employees and HR administrators, improving efficiency and ensuring compliance with the ministry's HR policies and regulations.

MealSmash:

MealSmash is a comprehensive food service management ecosystem comprising six integrated applications:

- MealSmash Kitchen: Streamlines order management for kitchen staff to ensure timely meal preparation.
- MealSmash Kiosk: A self-service solution for customers to place orders in restaurants or cafes.
- Waiter: Helps waitstaff efficiently manage customer orders and table assignments.
- Merchant: Enables restaurant owners to monitor operations, manage menus, and track sales.
- Customer: A user-friendly app for customers to browse menus, place orders, and make payments.
- Feedback: Gathers customer reviews and feedback for service improvement.

This project enhances the overall customer experience and operational efficiency in the food service industry, offering a seamless end-to-end solution for businesses.

SalahMate:

SalahMate is a comprehensive Islamic lifestyle ecosystem aimed at helping users live a fulfilling Islamic life. It consists of three integrated applications:

- SalahMate User: A mobile app guiding users in their spiritual journey with features like a Qibla compass, Masjid finder, and other essential tools for religious practices.
- SalahMate TV: Installed inside mosques, this app provides real-time prayer timings, important announcements, and other mosque-related information.
- SalahMate Kiosk: Designed for facilitating donations, this app streamlines the process for users to contribute to their chosen causes easily.

This ecosystem serves as a holistic solution for supporting and enhancing the religious experience of its users, both inside and outside the mosque.

PrePostOpGuide App:

PrePostOpGuide is a specialized app for hair treatment and hair transplant clinics, focused on tracking and managing the pre- and post-procedure processes. The app provides patients with detailed guidance on preparation before treatments and monitoring recovery progress afterward.

This tool ensures a smooth experience for both patients and clinic staff, improving overall treatment outcomes and enhancing patient care.

Css Exam Companion:

This app targets the people who are going to attempt CSS exam, the main motto of this app is to provide helping material to students who wants to become css officers.

POD App:

It's an EMR system-based application that allow users to analyze their health reports and other health related graphs. Inorder to achieve these features we are fetching data from Athena health system.

Eload App:

This app will be going to launch globally in near future. It's just like an easy paise app but with its own currency that is GCR (Green Credits), 1GCR = 1 USD. It also has feature to send gift cards and greeting cards.
